Group Work Form

Member names: A: B: C:

Case: Your team is in charge of designing a cybercrime database to store the data of criminal incidents for a local police department. The data are about cyber criminal incidents, cyber criminal suspects, victims, date and time and details of the incidents, and possibly other details that may be useful for police officers. In the box below, list the tables (at least 3) and fields that may be used. Relate these tables using primary and foreign keys.
